SUMMARY

Detail-oriented and data-driven Product Analyst with strong experience in credit and fraud risk modeling, ETL workflows, and scalable data analytics solutions. Proficient in Python, SQL, Tableau, and Power BI, with a solid understanding of regulatory and operational risk metrics. Skilled in delivering actionable insights through dashboards, experimentation, and machine learning, with a focus on efficiency, risk intelligence, and product strategy.

PROFESSIONAL EXPERIENCE

American Express | Product Analyst

July 2023 – Present

- **Designed and implemented 200+ authorization controls** for fraud detection and credit risk prevention, improving user segmentation and model precision.
- **Analyzed key product metrics and customer usage trends**, impacting over **30M+ global customers** with improved risk models. Collaborated with cross-functional stakeholders to align risk insights with business goals and product roadmap.
- Automated ETL workflows for JIRA review process using Python, **reducing** manual processing time from **8 hours to 10 minutes**. Created and maintained dashboards using **Excel** and **Tableau** to monitor product performance and risk metrics.
- **Delivered regulatory-aligned risk metric tracking** through systematic reporting and stakeholder communication.
- **Led and mentored** a 4-member team to ensure alignment with product requirements and successful onboarding. Presented key strategic updates and risk insights to leadership for informed decision-making.

American Express | Analyst Intern

Jan 2022 – June 2022

- Built an **automated Selenium-based Python script** to extract data and generate reports, saving **3 months** of manual work.
- Migrated **60M+ customers** to improved credit risk models and supported **A/B testing** to optimize fraud detection strategies.
- Delivered presentations on model performance and product impact, translating **complex data** into clear recommendations.

EDUCATION

Punjab Engineering College, Chandigarh, India

Bachelor of Technology (Electrical Engineering), 2019 – 2023

CGPA: 7.9/10.0

SGGS Collegiate Public School, Chandigarh, India

Class XII (CBSE - Non-Medical), 2016

Percentage: 85.2%

PROJECTS

Feedback Sentiment Analysis | Python, NLP, NLTK, Flask

- Built an NLP model for classifying feedback sentiment as positive, negative or neutral; performed preprocessing on textual data using tokenization, lemmatization, stop-word removal etc.
- Developed a Flask-based UI for real-time classification and insights.

Credit Card Fraud Detection System | Python, Scikit-learn, Pandas, SQL

- Developed a predictive model using transaction data and logistic regression in python to detect fraudulent transaction and QL queries for retrieving data.

Feature Adoption Analysis | Python, SQL, Tableau, Google Analytics

- Analyzed feature adoption using A/B testing and cohort analysis; proposed onboarding improvements.

SKILLS

- **Data Analysis & ETL:** Python (Pandas, Numpy), SQL, Excel, Tableau, Power BI, Jupyter Notebook, Selenium
- **Risk & Product Analytics:** Credit Risk Modeling, Fraud Detection, Time Series Analysis, User Segmentation
- **Modeling & Experimentation:** A/B Testing, Regression, Random Forest, Naive Bayes, Neural Networks, LLM
- **Collaboration & Reporting:** Cross-Functional Alignment, Risk Metric Reporting, Stakeholder Communication
